Friends and Neighbors,

Beginning approximately the second week of August construction will begin on two sections of water line replacement.

This project is estimated to be completed by early November.

Areas that will directly be affected are; County Route 29, approximately a quarter mile from the intersection of 28N, Hardscrabble Road and the entirety of Town Shed Road.

Our last major water line replacement was approximately fifteen years ago. After this project we are very close to having all of our sixty plus year old lines replaced. For the last few years we have had multiple breaks and service failures on these two lines.

Planning for this replacement has been ongoing for the last few years, trying to get as much funding as possible. We have received a Community Development Block Grant(CDBG) for one (1) million dollars. The remaining one point five (1.5) million dollars will be financed through the Environmental Facilities Corporation(EFC).

We are hoping for very little traffic and service interruption while this project is underway. We will continue to post any changes on our town Facebook page and Web page. Additionally, we will use our One Call Phone System, as needed, for any required notification. If you have not signed up for our One Call System, forms are available online or in our office.

Thank you for your patience,

*Stephen McNally*
